Current Topics in Geosciences - HS 2018

mittwochs um 16:15 bis ca 18 Uhr, Bernoullianum, Hörsaal 223

3. Oktober

Martin Hipondonka, PhD, University of Namibia

The Ephemeral Cuvelai-Etосha River System: A geomorphic analysis of its channels and the hydrological symbiosis with neighboring perennial rivers -

[Abstract](#)

Host Prof. Nikolaus Kuhn

10. Oktober

Dr. Zamin A. Kanji, ETH Zürich

Aerosol particles as ice crystal seeds in the troposphere:

From nano-pores to clouds - [Abstract](#)

Host Prof. Christine Alewell

17. Oktober

PD Dr. Guido L.B. Wiesenberg, Universität Zürich

New insights into uncertainties of paleoenvironmental reconstructions based on paleosol-sediment sequences - where geology meets soil science -

[Abstract](#)

Host Prof. Christine Alewell

31. Oktober

Prof. Stewart Barr, University of Exeter, UK

Sustainable Mobility in an Age of Climate Change - [Abstract](#)

Host Prof. Nikolaus Kuhn

21. November

Dr. Tonya DelSontro, University of Geneva

Aquatic Greenhouse Gas Emissions in a Changing World - [Abstract](#)

Host Prof. Moritz Lehmann

28. November

Dr. Carita Augustsson, Universität Stavanger, NO

Provenance analysis – aims an applications - [Abstract](#)

Host PD Dr. Michaela Spiske

Stand 1.11.2018

Koordination: Rosmarie.Gisin, T +41 61 207 36 45, Rosmarie.Gisin@unibas.ch
